DETAILED ACTION

I. Rejection of claims 4,8 under 35 USC 102(b) will be maintained as being anticipated by BE 892401 or JP 50129361 on record for reasons on record and as follows. Add new claim 19 to this rejection.

Applicant argues that the plant activating agent (stearic acid) of formula II is effective when applied to the root or leaves. Applicant argues that instant formula II agents activate plants by promoting permeation which is evident by their affect on chlorella cells. Examiner argues that Applicant claims do not embrace that method entails application of the formula II agent (stearic acid) to plant leaves or roots. Examiner argues that Applicant claims do not address Applicant's finding with respect to chlorella cells. Examiner argues that Applicant claims only recite the application of stearic acid (formula II agent) onto plants which is also taught by the prior art references. Examiner still maintains that prior art application would inherently promote plant growth.

Allowable Subject Matter

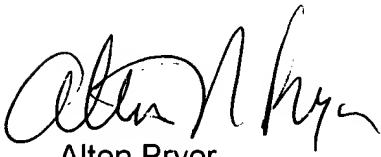

Claims 6,7,10-18 are allowable. The prior art does not teach or suggest the instant invention comprising the limitations of the claims.
